Macdonald College

Macdonald College Annual

All hail, Macdonald! We sing to thee.

Fairest of colleges: Give her three times three!

Long may we cherish her. Faithful we'll be.

Macdonald's the College for you and me.

Strong as the Ottawa past thee doth flow,

Forth from thy portals shall thy children go

Never forgetting thee or thy good fame.

Macdonald, we'll conquer by force of thy name.

All hail, Macdonald! Though gone from thee,

Sweetest of memories always thou wilt be.

Thou gav'st us knowledge, courage, and friends,

And though we have left thee thy gift never ends.

1934 - 35

Our College Motto

*T*HERE is no official record of our College Motto, in fact there are very few people who can remember anything about its selection. It is probable, only for a lucky incident in the summer of 1932, that all traces of the choosing of these words would have been lost. It is very essential that the facts, as far as can be obtained, should be recorded. Frequently misinterpretations become prevalent, thus the original desires of our Founder are lost, however, this can now be prevented by making what facts are available into a permanent record. The Annual provides an excellent opportunity for this, in addition it has a two fold service in that the information is widely spread and may stimulate further research in this direction.

Many thanks are due to Rev. C. H. Adair for discovering the author, and for keeping in touch with him. A letter, written to Rev. Adair by T. D. Jones, is published in its entirety and it explains itself.

Dear Mr. Adair,

You asked me to relate the fact concerning the selection of these words "Mastery for service" as the motto for the College and I am happy to be able to provide you with an account of what I know of the facts.

Inspired with a course of lectures dealing with "The Servant of Jehovah" and having undertaken work at Ste. Anne de Bellevue for the Methodist Church, I prepared a series of addresses or Sermons in which I reasoned that, "Service" is the finest motive upon which to build a career. I had announcements made of my themes, "Service"; "Equipment for Service"; "Efficiency for Service". I had completed the forgoing when I was invited to have dinner with Principal Robertson the following Sunday evening, an honour I was happy to accept. For though Dr. Robertson did not attend any of our Services, I had heard much of him and was vastly interested in his vision of things.

After dinner, he and I retired to the front room where we chatted for some little time. Dr. Robertson then said, "I wanted to meet you, for though I have not attended your Church, I have followed your talks closely through others, especially these last upon service. Sir William Macdonald and I have been concerned somewhat in the selection of a College Motto and have not found in the Classics exactly what we felt would embody our objective. We have been impressed with your themes, and Sir William suggested that we could not do better than choose one of these as our College Motto. Would you mind?" I was overwhelmed at the news and replied, "Dr. Robertson, the words are yours if you choose to use them." I was interested to know which was the choice, but he proceeded to ask, what other themes I meant to select. I replied that there was but one other, "Mastery for Service." "How do you mean to deal with it?", he asked. I said, "I am following this line of thought,—First, the complete Mastery of the Self for Service, as the Mastery of the Mental processes; the Mastery of the Powers of the body, the Mastery of the Passions; the Mastery of the emotions—and second, the Mastery of the world for Service, as the Mastery of the Mental processes; the Mastery of the Powers of the body, the for service in any sphere in which one finds life." We discussed the matter for a few moments, and when I presently left, I had an idea that the Principal would recommend the use of the third theme, "Efficiency for Service," though exactly what were his thoughts as to the final selection intrigued me. Apparently Sir William Macdonald and Dr. Robertson felt that the last theme embraced all the rest, though I never heard any account of the final discussion.

I preached at Ste. Annes for two years and had the great pleasure of being the guest of Professor Fred C. Elford, not only each week-end, but for several weeks in the summer. I believe he is still in a position to corroborate the foregoing record for it was from him that Dr. Robertson requested an account of my addresses. Not until 1932, after a period of 24 years, did I return to the College for a visit. My emotion, when I saw my old theme in the stained glass windows near the doors of the college Auditorium, and realized that thus the words were made permanent, was very deep. That I have any part, even a small part in the scheme of things, which has grown from the amazing liberality of Sir William is a matter for thankfulness. That, sir, is the story.

Wishing you uttermost success,

Yours sincerely,

THOS. D. JONES.

The statements in this letter have been confirmed by F. C. Elford, who was connected with the College at that time and is now at Ottawa.

HON. ADELARD GODBOUT

Minister of Agriculture, Province of Quebec

Message

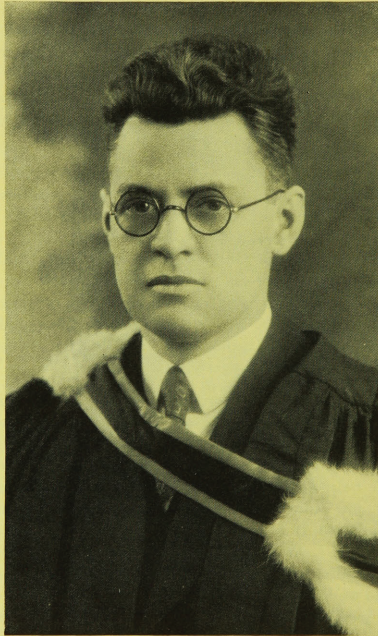

SCIENTIFIC agriculture is in continuous progress all the world over. The general business depression, far from being a cause of stagnation in research and experimental field work in connection with agriculture, has assuredly been an efficient incentive to much progressive work. It is now an acknowledged fact that the nation's welfare can only be furthered by applying a scientific agriculture especially adapted to the nation's needs."

"The Province of Quebec was not the last to venture along this new path; by favouring the development of its agricultural schools, it has given rise to men of technique, pre-eminently versed in modern agricultural science. Our farmers, now following the movement, earnestly strive to take the full benefit from the judicious advice they are given. It may then be ascertained from this, that the young men of to-day, who are toiling to acquire the knowledge of science of agriculture under competent and devoted masters, will shortly become the leaders of a whole phalanx of farmers eager for progress towards perfection."

"To the young men now engaged in the study of agriculture, more particularly to those, who soon will have to put their knowledge to the test, I wish the success that comes after earnest application and conscientious work. To them all I would say:—"Be in life more than technicians, be real apostles of agricultural education and knowledge; be living examples of that which scientific agriculture can achieve, and you will then contribute to the only wish we can formulate—that our Province be helped by the understanding of a learned agricultural community, free from routine and well prepared for the great achievements that constitute the future goal of the agricultural nations, conscious of their noble role at the very foundation of mankind."

ADELARD GODBOUT,

Minister of Agriculture for Quebec.

W. H. BRITTAIN,
Vice-Principal

Message to Students

THE impelling motive behind the founding of Macdonald College was a sincere faith in the power of education, technical training and research to solve the problems of the farm, to increase the individual efficiency of the farmer, and to supply trained leaders to solve the problems of rural living. The Founder's desire was to raise the intellectual and cultural level of the rural population, by making it possible for the youth of the country to secure as high a type of training as that available to those living in the city.

Though suffering many heavy shocks in its short history, the institution has kept in the forefront of progress in its own peculiar field. While maintaining and improving the vocational course, she has been a pioneer in placing her degree work on a university basis, while her position in the field of graduate instruction is unique. Outstanding contributions in the field of research and many other substantial achievements redound to the credit of staff and graduates.

It is a pleasure to be able to record the fact that the comparatively small student body has been able to carry out a programme of activities that would do credit to a much larger institution. In all competitive events they have more than held their own. In the difficult art of self-government the present generation of students has set a record that it will be hard to surpass.

As an educational and research institution, Macdonald College can justly claim to have been a success and to have realized, at least to a considerable extent, the ideals of her Founder. Difficult times are ahead, but with the support of a loyal student body and alumni and staff, she will not fall behind in the race.

W. H. BRITAIN,

Vice-Principal.

THE YEAR'S CHANGES

J. F. SNELL

THE life of a college, like that of any organization, is subject to continual changes, and for Macdonald, this year has brought important developments. Some of these are incidental to changes in the University organization.

The office of Dean of the Faculty of Agriculture, left vacant for nearly two years following Dr. Barton's resignation, has been filled by the appointment of Dr. W. H. Brittain. Dr. Brittain's qualifications for the office are, in more than one respect, unique. The son of a member of the original Faculty, the late Dr. John Brittain, Professor of Nature Study, he entered the college at its opening and, by virtue of his initial, was the very first man to receive the diploma of Bachelor of Science in Agriculture from McGill University. He remained in the college for one year as Assistant in Biology, then spent two years in British Columbia as Provincial Entomologist and Plant Pathologist. From 1914 to 1926 he was Provincial Entomologist in Nova Scotia and Professor of Entomology in the Nova Scotia College of Agriculture. During that period he found time to pursue graduate studies in Cornell from which University he received the degrees of M.S.A. (1920) and Ph.D. (1922) and also to make a tour of Asia and North Africa. For some years after his appointment to the Chair of Entomology in Macdonald College he spent his summers in Nova Scotia, continuing work, previously begun, on the relation of bees to the fertilization of apple blossoms. The results of this extensive study have been published as a bulletin of the Dominion Department of Agriculture. His high standing in his own department of Science, his interest in all branches of agriculture, his ability as a speaker and his genius for organization augur well for his success as Dean of the Faculty.

The Statutes of McGill University, which define the duties of its various authorities, were revised during the session, receiving their

final approval from the Board of Governors on January 30th. Wherever possible the "schools" of the University are attached to an appropriate Faculty—the School of Commerce to the Faculty of Arts and Sciences, the School of Architecture to the Faculty of Engineering and the School of Household Science to the Faculty of Agriculture. Some, such as the School of Physical Education and Library School, which cannot appropriately be assigned to any single Faculty, are placed under the direction of committees appointed by the Senate. The School for Teachers falls into neither of these categories, being controlled by a committee established under an agreement with the Province of Quebec and subject to regulations made under the statutes of the Province. Its status remains unchanged.

The heads of Schools are to be designated Directors, those of Faculties, Deans and the Dean of the Faculty of Agriculture is to be *ex officio* Vice-Principal of Macdonald College. This last item is not, as some may think, an innovation but, instead, a restoration of the original "Principalship" (vacant since 1925) under a more appropriate title, the College Principal having always obviously been subordinate to the Principal of the University. Deans of Faculties and Directors of Schools are appointed by the Board of Governors on the recommendation of the University Principal. The College Bursar becomes the Secretary of Macdonald College, his duties remaining essentially the same as under the former title. The statutes provide for a governing officer of each residence hall, to be designated "Warden" in analogy to the head of the Royal Victoria College. They also provide that all students, whether living in the College or not, shall be registered in one or other of the halls, as well as in their Faculty or School.

As the supreme academic body of the University the "Corporation" has been replaced by a smaller body called the Senate, made

up of the Chancellor, Principal and Deans, the Warden of the Royal Victoria College, the Director of the School for Teachers, five members of the Board of Governors and representatives of the Faculties. The Senate determines the academic policies of the University, recommending to the Board of Governors such changes as the establishment or discontinuance of faculties or schools and passing upon all recommendations of the Faculties for alterations in entrance requirements, courses and so on. The most serious breaches of discipline on the part of students, have also to be referred to it by the Faculties. The selection of Professors is no longer to be the sole responsibility of the Deans and Principal. The Senate is to appoint two persons and the Chancellor one person, to form with the Principal and Dean or Deans concerned a Board of Selections to report to the Board of Governors.

In spite of retrenchments necessitated by reduced income from investments, it has been found possible to extend some lines of experimental work, particularly those receiving financial support from outside sources. The building of the Institute of Parasitology, the maintenance of which the National Research Council assumes, has been completed. The work carried on there by Dr. Cameron and

his staff, so important to the live stock and poultry industries and so ably instituted and directed, will accordingly be continued under greatly improved conditions. The various projects carried on in conjunction with the Provincial Department of Agriculture are to be continued. These include studies of pasture improvement, soil fertility, fertilizer practices, drainage, animal and poultry diseases, plant diseases, insect pests, etc. The Provincial and Dominion Departments of Agriculture have also instituted a survey of certain types of soils in the Province and have placed the work under the direction of Dr. McKibbin of the Chemistry Department. A survey of the muck soils in the vicinity of Montreal was begun last summer. This is to be continued during the coming summer and some work to be done upon another class of soils. The experimental work upon the growing of vegetables in muck soils, which has been carried on by the Horticulture Department for a few years, will be continued to better advantage upon some of the best soils discovered in the survey. The survey involves a great deal of analytical work and this is being carried on in our Chemistry Department during the winter months. The work of Prof. Maw and Dr. Holcomb on poultry nutrition, begun last year, is receiving support from the Dominion Department of Agriculture.

MACDONALD COLLEGE ANNUAL EDITORIAL BOARD

Editors

S. F. KNEELAND

Business Manager

J. Y. CARLYLE

Advertising Manager

D. M. SMYTHE

WE, the Editorial Board, hope our efforts to produce one Annual for all tastes will meet with your approval. If it has been our privilege to give you a book which may be treasured as a symbol and a record of your college days, we are wholly satisfied.

EDITORIAL

IT is with a great deal of pleasure that we present this Annual to you, making an attempt to give you a resumé of the year's activities. The policy we have before us is to prepare a book which will always be an inspiration to look back upon our college years. This entails a record of all activities, including photographs where necessary. We cannot succeed in pleasing everyone, but we hope that everybody will at least find some part to please them.

The College year started with the appointment of a new Dean of Agriculture. Dr. Brittain has been known to many of us before he undertook this new position, but it is only now that we realize how well qualified he is to be our Dean. Throughout the year many changes have been brought about in the Faculty of Agriculture, all bringing beneficial results. The improvements have been effected gradually devoid of that officiousness, which tends to reduce the desired spirit of co-operation between students and authorities.

Later in the year Dr. Brittain was made Vice-Principal of the College. This position has been left vacant since the death of Dr. Harrison, since when we have been governed by an Executive Committee which, although functioning admirably, could hardly be expected to fulfil entirely the offices of a Vice-Principal.

The Dean's appointment of a Student Relationship Committee to study the many problems of student life has been a step in the right direction. The work of Prof. L. C. Raymond, Messrs. L. H. Hamilton and A. G. J. Mau, the members of this committee, has already borne considerable fruit. We, as students, fully appreciate their contributions.

An article has been included, written by Dr. Snell, it is hoped that it will prove interesting to all of us. Since the College opened Dr. Snell has been a member of our staff—his article gives us something of the perspective, which as students, here to-day and gone tomorrow, we could not otherwise obtain.

Nobody ever gives the origin of our College Motto a thought, but we feel that it is as important as the words it contains. A letter, received during the year through Rev. C. H. Adair, makes an addition to our attempts to preserve what tradition has bequeathed to us.

This year the Debating Union has given us a very successful programme. A new feature was the innovation of a series of two debates against Guelph (O.A.C.), these, and a debate against the Oxford and Cambridge team constituted the outside contests. Here is some evidence that smallness in numbers is proving less of a handicap than in the past. The parliamentary ideas incorporated into the Robertson Shield Contest further added to the interest taken in debates.

The success of the Play Contest has been continued this year and has proven a worthy tribute to Magnus Pike and Hector Munro, to whom we are indebted for its inception. Aird Nesbitt with his customary generosity denoted the Nesbitt Play Contest Shield, a visible stimulus to our college dramatics.

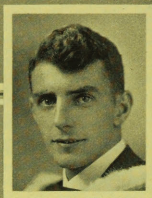

The entrance of the Players' Club into the Quebec Section of the Drama Festival, also aided by Mr. A. Nesbitt, was the Club's outstanding achievement for many years.

STUDENTS' COUNCIL

*"The hands of the clock were closing like scissor blades
on midnight, snipping off another day."*

—BROOKS.

IT seems that one scarcely has time to finish reading the annual before it is time to begin preparation of the succeeding one. As one grows older, the hands of the clock move faster and faster, and one realizes more and more vividly the utter impossibility of holding them back or slowing them up. Realizing this, one can only try to live each hour of the day as fully as possible, to accomplish as much as possible during these few years of college life.

In a residential college such as ours, more thought must be given to extra-curricular activities than is required at universities where the students assemble only at lecture periods. These activities are capably taken care of by the various clubs and societies of the college, the necessary cooperation and continuity between these societies being an important function of the Students' Council. The detailed accounts of the activities of these organizations which appear elsewhere in this annual indicate the wide and varied fields which they cover.

The sympathetic relations which have always prevailed between the staff and the student body have been strengthened by the formation this year of a Student Relationship Committee. The members of this committee are prepared to aid students in selecting and arranging their courses, and to help them in any way possible with personal problems.

Several new activities have been sponsored by the Students' Council during the past year. With the cooperation of the Student Relationship Committee, a coffee shop was organized in the Men's Residence where tobacco, chocolate bars and light lunches may be purchased.

The formal dances, college plays and the Green and Gold Revue require a considerable amount of scenery, and until this year this work has been done by the various groups concerned. This has resulted in a certain amount of waste and duplication, and to co-ordinate these activities the Council has supplied a complete set of tools to a group known as the "Craftsmen's Guild" to which

will be entrusted all such work in the future.

A committee of the Council was formed in the Fall to study the question of an official Macdonald College blazer, which any student of the college would be entitled to wear. As a result of their efforts we now have an official blazer, comparable in style and quality to the familiar McGill blazers. It is unfortunate that these were not available earlier in the year, but the delay was unavoidable.

Control of the tennis courts and of the rink has now been placed in the hands of the students. A representative committee of staff and student members is appointed each spring to administer the courts during the summer months, the President of the Council automatically becoming President of this committee. Through the generosity of Mr. Ward, two challenge cups have been presented for annual competition, one for men's singles and one for ladies' singles matches, which are competed for each Fall.

A college handbook of information for the benefit of incoming students is being prepared, and it is hoped that this will be available for distribution next Fall.

We have continued our affiliation with the N.F.C.U.S., and expect to entertain a debating team from the Universities of British Columbia and Saskatchewan next year. We have also strengthened our cordial relations with our sister college at Guelph by a series of debates, one at Guelph and one at Macdonald.

The formal dances have been particularly successful this year, and the Saturday night "hops", music for which is furnished by the college orchestra, always draw a large crowd. Wednesday evening musicales, lectures, plays, etc., have supplied varied entertainment to suit every taste.

Any measure of success which we may have achieved during our tenure of office has been due to the hearty cooperation we have received from staff and students alike, and it is our hope and expectation that next year's Students' Council will continue to receive this cooperation.

"Literature is the Thought of thinking Souls."—CARLYLE.

MAINTAINING its organization under the system inaugurated last year, the Lit has completed another successful season of varied activity. Owing to the increased amount of routine work engendered by the expansion of activities and further call upon outside entertainment, it was thought advisable, at the beginning of the year, to divide the Secretaryship and Treasurership between two officers. This was the only radical change in the organization introduced this year.

It was evident almost at once that, partly owing to the diminished numbers of the student body, the funds at its disposal were inadequate for the year's programme. It was therefore decided to make an admission charge for the Christmas play. On this occasion and subsequently, however, the procedure met with considerable opposition among the students, so that, at the end of the year,

a meeting was called and an attempt made to obtain the backing of the students in an increased preliminary subscription to the society, in order to obviate the necessity for making admission charges during the year. The suggested subscription was \$1.00 for all degree course students and 75c. for all short course (including diploma) students. A majority of 44 votes in favour of the increased subscription was obtained from 110 students who attended the meeting. The society decided, as a result of this ballot, to leave the matter to the discretion of the officers for the following year. At the same meeting, however, a revised, redrafted and up-to-date constitution of the society was read to, and passed by the students.

Turning in retrospect to the year's entertainments, a lively interest was maintained during the first term's programme, which consisted chiefly of the productions for the Inter-Class Play Contest. A definite improvement in the standard of acting and production

among all plays was noticeable this year. The Nesbitt Shield, the generous gift of Mr. Aird Nesbitt of Montreal, is now the trophy for this competition. The high standard of the last few years was fully maintained in the activities of the three daughter societies, the Debating Union, the Players' Club and the Play Reading Club. Each of them made invaluable contributions both towards the realization of the object of the society and to its programme of entertainments.

We were indeed sorry not to have the help and cooperation of the Concert Orchestra this year. It was of no small assistance to us last year in providing incidental music during some of our dramatic productions, and its place was only partially filled this year, by the occasional use of the orthophonic.

THE PLAY CONTEST

Four evenings in the first term were devoted to the Play Contest. It was found by experience last year that, in spreading the plays over both terms, interest in the contest as a whole was apt to flag. The following were the plays produced:

Diploma I and Homemakers—

The Matrimonial Agency

Diploma II and Homemakers The Crimson Cocoanut
Teachers Section A The Twelve Pound Look
Teachers Section B Voices
Freshmen Agr. and B.H.S. The Exchange
Sophomores Agr. and B.H.S. Wurzel-Flummery

Seniors Agr. and B.H.S.—

They Refuse to be Resurrected

Results:—1st Place Seniors
2nd Place Sophomores
3rd Place Teachers Section A

ALICE IN WONDERLAND

It has for some time been the cherished hope of many people at the college that a more real contact might be made with the Alma Mater by a regular exchange of dramatic productions. This year, owing chiefly to the efforts of the English Department, the production of "Alice in Wonderland" by the Department of English at McGill, was staged in our Assembly Hall. The effective handling of this play by both cast and management, together with its significance as the first step towards what might become a regular interchange between the two institutions, commend it as being one of the prior entertainments of the year. Particularly impressive in the Production were the costumes, made by the students themselves, and the facial conversions also mainly done by the actors. As was so essential to the success of this production, the

entire cast threw themselves wholeheartedly into the spirit of sublime idiocy demanded of them, and enjoyed themselves as much as the audience. We would like to take this opportunity to express our thanks to Mrs. Glassford, director of dramatics at McGill for her untiring efforts and splendid cooperation with us in making the visit a success, and to our own Sceneshifters' Guild, without whose all-night efforts at re-erecting and rearranging sets from the G and G, the production would have been impossible.

THE DRAMA FESTIVAL

Another milestone was reached in our dramatic progress this year, when a play was entered in the regional section of the Dominion Drama Festival. Had it not been for a financial guarantee from interested members of the staff, we should not have made this venture. The play entered was the winning play in our own Inter-Class Contest "They Refuse to be Resurrected" a fantasy by N. K. Smith. It was placed third by the adjudicator, out of the eight plays which were entered in the Montreal region. We feel that the result of this initial venture was gratifying enough to persuade us to try again next year.

PLAY READING CLUB

Under the management of Gordon Hebert, this club has again provided enjoyment for the interested few, and proved of great benefit to the Players' Club in its search for talent. A valuable step in its organization has been the regular hire of copies of plays from the Ontario Dramatic Library. This arrangement has proved extremely satisfactory to the club, and the expense to the Lit was at the same time, almost negligible, since the club was enabled to contribute one evenings entertainment to the Lit programme, in the form of a combined reading and acting of W. W. Jacobs' drama "The Monkey's Paw".

CONCERTS

Early in the first term, we heard a charming recital of Dutch Songs and Poems by Miss Cornelia van Geuns. Just before Christmas, through the continued kindness of Mr. Aird Nesbitt, we were able to hear those glorious people, the Fisk Jubilee Singers, who came to us again after a lapse of three years. During the second term, we were able to procure two very fine male choirs, the Y.M.C.A. Glee Club, under the direction of Mr. Shirley McKyes, and, as the final entertainment of the year, the Royal Bank Men's Choir, conducted by Mr. Walter Clapperton. This splendid group,

(Continued on page 62)

MEN'S ATHLETIC ASSOCIATION

President F. Cooper
Secretary E. Snilner

Vice-President D. Smythe
Treasurer W. A. Humphreys

IN reviewing the work of the Association it may be said, with truth, that we have completed an eventful athletic year.

The student body this year consisted of fewer men students than in average years, consequently we received a smaller allotment. This student body although small, has had a wide and varied athletic taste and the Association has endeavoured to satisfy this variety to the greatest extent on a comparatively meagre allotment.

The allotments for the various sports were drawn up by the Executive Committee and were then passed by the Standing Committee. The various sports were given appropriations according to their standing, the major sports, Canadian Rugby, Basketball, and Hockey, receiving the largest, the minor sports, English Rugger, Soccer, Wrestling, etc., were given as much as possible. The Miscellaneous Fund is for the purpose of purchasing awards such as cups, crests, ribbons, etc., for the players of the various sports and to cover incidental expenses.

Some alterations were made in appropriations; for instance the Canadian Rugby Team, due to the fact that no games were played away, did not utilize all of its appropriation. On the other hand Basketball and Hockey allotments had to be supplemented.

The various teams have been comparatively successful this year. The Canadian Rugby Team lost only to Medicine in the Interfaculty Series. The College Hockey Team took part in the Interfaculty Series and the Basketball Team was entered in the Inter-Collegiate League.

TRACK

The annual Track Meet was held on October 17th. Both weather and the enthusiasm of all concerned helped to make the meet a great success. Inniss (Senior) won the aggregate with 27 points, Hebert (Sophomore) took second place with 16 points, and F. Cooper and G. Ayres tied for third place with 9 points.

The class aggregate was won by the Seniors with 57.

The meet was creditably managed by Bruce Inniss.

Ayres was also a member of the McGill Intercollegiate Track Team.

BOXING AND WRESTLING

More than usual interest was shown in these sports, especially in the wrestling. This year it has been possible to send in an Interfaculty Wrestling Team with a representative in every class except the open.

F. Cooper managed the two activities, and at the same time gave material help to the boxers.

Only one Smoker was held this year, but this was rumored to have been as good as any that had ever been held at Macdonald College.

HOCKEY

The Hockey team figured prominently in the Interfaculty League and also played a great number of exhibition games. Interest in interclass hockey was again revived. Under the able management of G. Ayres the series was completed without a hitch. The championship was won by the Junior Dips.

Credit is here due to Scott Kneeland, who made an exceptionally good job of managing the team, to Armand Dubreuil for coaching, and "Bob" for providing good ice.

THE SKI RACE

The Annual Ski Race this year was under the supervision of C. Cross. W. L. Muir, a Junior Dip won the race with C. Cross coming second. A close finish provided excitement to all who were fortunate enough to witness the event.

SWIMMING

The Annual Swimming Meet was held on March 15, with B. de L. Inniss as manager. The individual aggregate went to Chodat (Teacher) with 30 points, Inniss (Senior) second with 9 points, and Smith (Freshman) third with 6 points.

Chodat broke three records. He lowered the time for the fifty-yards free style by two-fifths of a second, the one hundred-yards free style by three seconds, and the two-hundred-yards by five seconds. He also plunged the entire length of the pool.

THE ICE CARNIVAL

During the first week in March the 1933 Ice Carnival was held with Reid as manager.

Ideal weather and perfect ice made this event a great success. All events, including the Science-Teacher hockey game, went off smoothly. The result of the game was a 5-1 win for the Teachers.

Refreshments were supplied by the coffee shop committee, to whom we are greatly indebted.

BASKETBALL

Due to a reduction in the number of eligible players, only one College team was formed this year. This team entered the Intermediate Intercollegiate League. Macdonald was not represented in the M.B.L. this year.

It was decided by the Association that the rule inaugurated last year, to the effect that members of the College Basketball Team should not participate in the Interclass Basketball League, was to be continued. The success of this rule has been evidenced this year by a vast improvement in the standard of the other players in interclass games.

The results of the Interclass Basketball Series were as follows:

Team	P.	W.	L.	Pts.
Dip II	6	6	0	12
Juniors	5	4	1	8
Seniors	6	3	3	6
Sophs.	6	3	3	6
Frosh	5	1	4	2
Dip I	6	1	5	2
Teachers	4	1	3	2

VOLLEYBALL

Volleyball, the other Interclass Indoor sport besides Basketball, had a successful season and the games were keenly contested. There were seven teams in the series.

The results were as follows:

Team	P.	W.	L.	Pts.
Seniors	6	6	0	12
Dip II	6	4	2	8
Juniors	6	3	3	6
Sophs.	6	3	3	6
Teachers	6	3	3	6
Frosh	6	1	5	2
Dip I	6	1	5	2

SOCCER

Once more we retained the Inter-Faculty Soccer championship by the close score of 3-2 in a game against Arts-Engineers. Five players were chosen to play on the McGill Intercollegiate Team.

The Interclass Soccer League for the Boying Cup was, this year, successfully completed. It was won by the Seniors.

In conclusion, the Association would like to thank the members of the Staff who co-operated and assisted at the various meets.

WOMEN'S ATHLETIC ASSOCIATION

Hon. President	Miss Heathcote	Vice-President	Mary Waller
President	Isobel Rothney	Secretary	Beryl Grande
Treasurer			Faith Meyer

ALL through the College year the Girls' Athletic Association was of chief concern. Due to the tremendous activity on the part of all, in sports, both winter and summer, its members were kept busy fulfilling their many duties and a very successful year was the result of their hard work.

Perhaps most of the girls' interest this year was taken up in basketball, always a favourite pastime. At the opening of the season the usual routine was begun; practices and hard work and, finally, the choosing of the teams. These teams formed a House League competing for the John T. Todd Basketball trophy,

a custom handed down through the years. There was a happy reunion when the Old Girls' team came out and also great excitement during the game between them and Macdonald's present team. Following the good example set last year, a game was arranged with Bishop's College and although there was some trouble over the rules it was finally fixed up and successfully played.

ARCHERY

Archery is fast becoming a favourite sport with the girls of the college, although it was begun for the first time last spring. During the Fall, great interest was shown by the number who turned out for this Saturday

morning pleasure. Towards the end of the season it was decided that it would be a brilliant idea to have the land by the tennis court cleared and made suitable for Archery. It is hoped that this will be carried out in the Spring when the sport will again be taken up enthusiastically.

BADMINTON

Badminton, this year, was played during all the spare moments and at many other times. At the beginning of the season Mr. Ted Green of the Montreal Restraining Club was present every Monday night, to coach the girls in their playing. This was a great help. There were about fifty entries for the first tournament, which was held in October. Consequently it took considerable time to run it off. Phyllis Brewer came out victorious with Joyce Miller runner up. Two tournaments with the Staff were arranged and they took the honours both times. Towards the end of March, the Macdonald girls proved the victors by a score of 3-2 against Bishop's College. This game was played at Lennoxville, really marking the end of badminton for the year.

SWIMMING

A cool, refreshing swim every night between ten and ten-thirty, was looked forward to by a number of the students as they wearily toiled through the long study period. A splendid opportunity was given to those proficient in this line of sport, to compete against one another in the annual swimming meet. It was managed splendidly by Phyllis Cameron, and was held during the latter part of the month of January. A chance was given for both the experienced and the beginners. The event, which was most interesting to the numerous spectators, was the first of the programme and took place in the form of a beauty parade. Beryl Sherman took first place in this event, appealing to the eyes of the judges. Her costume consisted of a bathing suit over which was worn a rubber cape—stockings and a hat completed her rig-out. Entertainment was next provided in the form of tricks, diving and races. Jean Robb and Babe Coulson displayed their skill in the tricks, and in the latter two, many points went to Phyllis Cameron and Wink Wilkins. The last event of the evening, the Teachers-Science relay, was given to the Teachers as the Science team was disqualified. Dean Laird

favoured us in the presentation of the prizes at the end of the meet, which were for all events Laura Secord chocolates.

HOCKEY

Not long after the ice was in good condition, the best skaters among the girls were enthusiastic about organizing a hockey team. Under the direction of Audrey Stein their several practices were held, but due to the fact that many had not even had a hockey stick in their hands before, it was rather difficult to choose a real team. Difficulties are always overcome by Macdonald students, though, and just in time for the Ice Carnival, a Teachers' team and a Science team were picked. And so, adding greatly to the entertainment of this night, a game was played between them. The girls made an effort to do their best and it ended with a score of 5-1 for the Teachers.

SKI RACE

The ski race on March 9th was not greeted as enthusiastically as it was thought it would be, but perhaps it was due to the cold weather. The starting point of the race was the rink and from there the skiers went around the Horticulture and Chemistry buildings and back to the rink again. Of the four entries, Elizabeth Hatheway took first place while Alma Mark was the runner up.

GYMNASTICS

March 15th caused much excitement, for it was the day set for the intersection competition. Long before that, though, girls could be seen faithfully practising in the gymnasium. The John L. Todd Gymnastic Shield was awarded this year to Section A of the Teachers. The individual competition followed, taking place on the same day, and the gold Todd Gymnastic Medal also awarded to a Teacher, Doris Benson, who expertly showed her ability in this line of work. The Todd silver, bronze and nickel medals were won by Eugenia Wypruk, Dixie Sawyer and Patsy Cameron, respectively. We owe much to Miss Heathcote who did all in her power to make the day a success.

And so, as we express our appreciation to the Staff for their kind assistance on many occasions the curtain closes on our athletic activities for 1934-35.

THE FAILT-YE TIMES

Editor-in-chief.....	R. J. Hilton	Assistant Editors.....	Helen Simpson
News Editor.....	A. G. J. Hebert		E. C. Burnell-Jones
Sports Editor.....	H. J. Miles	Manager.....	J. Y. Carlyle

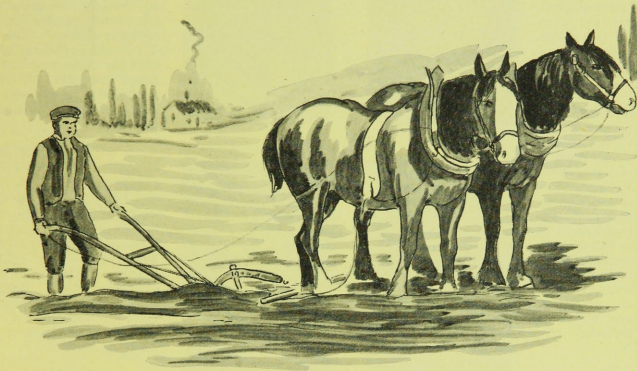

A S in the two previous years, the thrice yearly magazine of Macdonald College was replaced by a weekly paper and a final annual at the end of the year. The publication of this paper has been under the jurisdiction of the Students' Council, who appointed an Editor-in-Chief, who, in turn, appointed an Editorial Board. The number of issues this year amounted to twenty, a decrease on former years, due to an economy measure on the part of the Council. The major concern of the editor has been punctuality, which is the politeness of kings and the despair of editors.

To the average student attending Macdonald, the Failt-Ye Times may be nothing more or less than an interesting little scrap of paper to be hastily perused and discarded. Does this same average reader realize that the scrap of paper has made him aware in a few moments, not only of what has passed, but of what is to come in the near future? This purpose is the one which we think pre-eminently justifies the existence of the paper. To those of the Editorial Staff, who have laboured until the small hours every Wednesday night,

a certain amount of pessimism and lack of enthusiasm is certainly not to be wondered at, and we have often wondered if the game really *was* worth the candle. We have struggled along, exhorting with violence often enough, and also, often enough, quite in vain.

But mayhap our opinions are biased. Another year will tell. Again the average student comes to the fore, and after all, he or she is the one to whom we are actually catering. Earnestly the Editorial Board has endeavoured to produce a paper that was "up to scratch". Was it? At any rate, we are hoping to blossom forth anew next year, with new and definite ideas in mind, for greater co-operative success. On the whole, it may be quite safely stated that a very successful year has been passed, due in no small part to the assistance and advice given by the honorary advisory editors, to whom the Editorial Board tenders thanks on behalf of the Macdonald College student body.

Thanks are also expressed by the Editor to those people who gave of their time and talents, to make the continuance of the Failt-Ye Times possible.

AGRICULTURE

With all good wishes
W. W. Brittan

AYRES,

GEORGE WILFRED

Born May 15th, 1911, at Charlottetown, P.E.I. Educated at Prince of Wales College, Charlottetown and later at Truro Agricultural College. Arrived at Mac, 1933. Activities: Basketball '33 "Greens." Winner Interfaculty Broad Jump 1934 and Second in Intercollegiate. Hobby: Baseball. Pet aversion: Keeping in shape. Favourite expression: "Curse the works." Option: Plant pathology.

CHAISSON,

THOMAS CHARLES

Born Inverness, Nova Scotia, January 23rd, 1912. Completed high school work there in 1929. Migrated to Nova Scotia Agr. College 1930. Graduated Diploma Course, 1931. Graduated Degree Course 1933. Joined ranks of "Mac" '35 in the fall of 1933. Activities: Wrestling, dancing, and general nuisance. Option: Agronomy. Hobby: Experimentation. Ambition: To learn to skate. Favourite expression: "Sufferin' cats, dere's odders!"

COOPER,

FRANK

Born London, England. Schooled Stationers' Company's School, Canada, spring 1931. Major team in most of Basketball, Rugger, Soccer, Boxing, Wrestling, Track, Intercollegiate Soccer 1932-35. Students' Council 1932-33. Vice-president Athletic Assn. 1933-34. President Athletic Assn. 1934-35. Class sports captain when necessary. Option: Animal husbandry. Pet aversions: Going Dutch, Liquor, Sunday lunch at College. Hobbies: Anything that looks like exercise. Catching and curing colds.

DINGWALL,

DAVID CAMPBELL

"Born 1820, still going strong."

Born Glasgow, Scotland, 1898. Educated at various schools. Great war 1916-19. Farming in B.C. 1919-31, then saw a light from afar. Activities: Vice-president House Committee 1933-34, secretary Political Science Club, 1933-34, secretary Debating Union, 1934-35. Orchestra, violin, 1933-35. Interclass Basketball; Interfaculty Soccer. Pet aversion: Noisy people. Favourite expression: "It's a crime." Option: Horticulture.

AGRICULTURE

FLOOD,
ROBERT

Born 1910, Blackpool, England. Schooled at Penketh, Lanes, Canada 1929. Received Diploma in Ag. 1931. Entered Degree course same year. Activities: Class president 1931-35; Soccer 1929-35; Intercollegiate 1932-35. Business mgr. "Falt-Ye Times" 1932-34. President Students' Council 1934-35. Debating Team 1933-35; Players' Club 1930-35; president Debating Union 1934-35; vice-president Pol. Econ. Club 1933-34. Option: (optional) Agronomy-Economics, Pursuits: Dating and debating.

GILBERT,

REGINALD DEVEBER

Born at Gagetown, N.B., July 8th, 1913. Early education at Gagetown High School. Attended Nova Scotia Agricultural College 1931-33. Migrated to Mac, 1933. Activities: Class secretary-treasurer 1933-35. Interclass sports. Option: Horticulture. Hobby: Bulletin collecting. Favourite expression: "No doubt about it."

HANOMANSINGH,

ROBERT STANLEY

"Ex nihilo nihil fit,
Labor omnia vincit."

Born November 6th, 1905. Educated Berbee High School. Obtained Cambridge School Certificate; nominee of B.G. Government to Imperial College, Trinidad (1926-1929). Appointed Government Agricultural Adviser (and at one time lecturer in Agricultural Science) since 1930. Entered Mac, September 1934. Favourite expression: "That's highly illogical."

HARRISON,

THOMAS BENNETT

Blossomed forth November, 1912, Lancashire, Eng. Educated at Sedbergh; eluded emigration officials 1931. Option: Bacteriology-Chemistry. College activities: Rugger 1931-35; Editor Falt-Ye Times 1933-34; Editor College Annual 1934-35. Other activities: Maple sugaring and edgewatering. Hobbies: Arranging parties and being philanthropic. Ambition: To become pale. Pet aversion: Soft drinks. Favourite expression: "Actually I was feeling perfect."

**HUDSTON,
H. RANLUPH**
(Henry)

Born July 13th, London, Eng. Educated, Bedford School, Eng. Macdonald 1931. Activities: English Rugby 1931-35. Secretary-treasurer Lit. & Deb. 1933-35; secretary Debating Union 1933-34; Syndic of Scene Shifters Guild 1932-34; Green and Gold Revue producer 1935. Hobbies: Making tea, appearing informally, and bits of wire. Favourite printable expression: "My dear fellow, you can't!" Pet aversions: Guy. Class plays.

**HUMPHREYS,
WALTER ALFRED**

Born May 4th, 1914, at Montreal South. Educated at Longueuil and St. Lambert High Schools. Hurried to Mac. 1931. Activities: College Basketball 1931-35; Inter-faculty Soccer 1934; Men's Athletic, secretary 1933-34, treasurer 1934-35. Dance orchestra 1933-35. Manager indoor sports 1934-35. Hobby: Saxophoning. Pet aversion: Lipstick. Favourite expression: "True, O King!" Option: Horticulture.

**INNISS,
BRUCE DE LISLE**

"All's well that ends well." Born February 16th, 1912, at Bridgetown, Barbados, B. W.I. Forsook the fair Isle of Barbados in September 1931, and entered Macdonald College. On the McGill Soccer Team 1932-34. Macdonald Basketball Team 1931-34. Treasurer, Students' Council 1934-35. Hobby: Cricket. Pet aversion: Teachers. Favourite expression: "Well, what the hell now?"

**LONGLEY,
HAROLD
GRAHAM, Jr.**

Born Paradise (Nova Scotia) September 18th, 1910. Attended school there in his spare time. Graduated from Paradise High 1928. Entered Nova Scotia Agr. College, 1931. Barged in at "Mac," 1933 and stayed. Activities: Rugby, wrestling, basketball, skating. President Men's House Committee 1934-35. Rink manager 1934-35. Ambition: To get "Sharpe" understanding. Hobby: Bugs. Option: Economics, entomology. Favourite expression: "O.K."

AGRICULTURE

**McCLINTOCK,
PEARL**

Born November 24th, 1899, San Francisco, Cal. Educated St. Andrews East Consolidated School, Keokuk High School, Keokuk, Iowa, Macdonald High School, Ste. Anne de Bellevue, P.Q., Mac. 1918-20. Returned in 1934. House Committee four years. Option: General Biology.

**McCOLLUM,
ALBERT EDWARD**

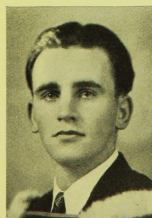

Born July 26th, 1905, at Saint John, N.B. Educated Fredericton High School and New Brunswick Normal School. Came to Macdonald from Nova Scotia Agricultural College. Activities: Inter-class sports. Option: Entomology. Pet aversion: Macaroni and cheese. Favourite expression: "Holy Judas Priest!"

**MORRISON,
AMELIA WHITAKER**

Born April 8th, 1913, near Vermilion, Alberta. Schools: Rural schools in Alberta, County School for Girls, Sidsup, Eng. Had a glimpse of Mac. in 1930 in the School for Teachers and was drawn back in 1931 to enter Agriculture. Option: Bacteriology-Chemistry. Pet aversion: High heels. Favourite expression: "Oh de-ah!" Ambition: To be in the G. & G. chorus and debate for the class.

**REID,
CLAYTON
STROYN**

"Whatever you do, do well." Born, January 12th, 1912, at Gagetown, N.B. Graduated from Gagetown Grammar School 1930; Truro Agricultural College 1931-33. Drifted up to Mac. 1933. Interclass Basketball 1933-35. Member of the House Committee 1934-35. Option: Horticulture. Hobby: Floriculture. Favourite expression: "Dammed if I know." Pet aversion: Asking questions.

SHEWELL,
GUY EADEN

Born July, 1913, Newcastle-on-Tyne, England. Educated at Christ's Hospital, Eng. Stalked into Macdonald 1931 to undergo a four-year blossoming period. Activities: Players' Club 1931-35, its president 1933-34. President Lit. & Deb. Society 1934-35. English Rugger Club 1931-35, captain 1933-35. Option: Entomology. Pursuits: Art and Literature—mysogeny—anything elusive. Pet aversions: Pumpkin pie and pansies.

SIDAWAY,
ERNEST PALLANT

"Yorkshire born and Yorkshire bred,
Strong i' t' arm and thick
i' t' ead."

Born August 1910, Yorks., Eng. Educated Sir William Turner's, Canada, 1930, Dip (lost his tie). 1931 changed his mind (wise man). Activities: Old McGill 1933-34. Pisces, painting and posters. Hobby: Bugle (blast him) Pet aversion: Yanks. Favourite saying: Censored.

AGRICULTURE

ZINCK,
CYRILL MILFORD

Born October 16th, 1910, at Halifax. Received early education at the Halifax Academy. Later spent two years at Truro taking the Degree course and the fall of 1933 found him at Mac. Activities: Treasurer of the House Committee and manager of the Rugby Team for 1934. Played soccer and basketball for two years. Option: Entomology. Hobby: Getting up early. Favourite saying "I must get to work."

Diploma '35

DIPLOMA 1935

President D. Macdonald
Secretary L. Harrison

ONCE again through the medium of the Annual the Senior Diploma year takes its leave. The year was started without a President owing to unfortunate circumstances. Cowan, our our previous president being unable to come back; Macdonald, however, on being elected in his place, ably filled the post throughout the year. Further elections were made and proved satisfactory in every detail, Harrison making a very competent secretary, and Gilker an efficient sports manager. It was through the efforts and enthusiasm of Gilker, that many of the successes of the Diploma teams must be credited. For the first time in many years the Diploma year won the indoor sports championship. Having reached the semi-finals of the Hockey, we were only defeated after a close game by Diploma '36. The ski race was also well represented by Dip. '35 men and finished the course with three members in the first seven. The swimming meet also added further laurels, by the Dip. team winning the Interclass Relay.

Throughout the year the College has seen Dip. '35 taking considerable part in nearly all its forms of activity. College plays have all had representatives from the year and the Green and Gold Review saw many others.

Thus we have completed yet another Diploma cycle, the individual merits will never be revealed as being a class we have maintained class standards and hope to have proved it.

D. Macdonald, our President hopes to finish this year at home and then, providing his present poultry enterprise is successful may continue further studies at O.A.C.

R. James is going back to Newfoundland, where he has been accepted as district Agriculture Representative.

L. Harrison is returning to his home and hopes in the near future to produce prize-winning Shorthorn cattle.

Miss F. Cuisinier is hoping to return to Macdonald to take the Degree course.

R. Gilker, after a successful summer of pea-growing in Gaspé, hopes to further his studies at Guelph.

R. Gahaghan has hopes of becoming one of "the Big five," in the Veterinary world. He will be taking a course at O.V.C.

E. Fiske, after finishing his studies at Macdonald next year, will be going back to Abbotsford to specialize in apple growing.

V. Belanger returns home to produce yet further prize-winning clover seed at Chicago.

A. Lanaghan is continuing his studies at O.A.C.

B. Archer is going to the West to manage a cattle ranch, after which he is going to Los Angeles.

M. Haslam, after a summer's work will be back at Macdonald to take the Degree course.

A. Ayre also is coming back to take the Degree course.

W. Clouston is going back to Newfoundland to specialize in fruit growing.

C. Caddell is hoping to go to South Africa to raise cattle.

W. Morris after a term in New York, taking a business training in fruit exportation from the Argentine, will return to Buenos Aires.

A. Churchill is going home to continue his great work in raising pure bred Ayrshire bulls.

It may be well to note that although Miss Cuisinier was the only girl taking the Diploma course, she showed much enthusiasm in all activities that the class were represented in.

And so the cycle has passed, and we leave our Alma Mater with profound regret . . . leaving with us, across years and miles until time forgets, its name "Macdonald Diploma '35."

**BECKER,
DORIS**

"They can, who think they can."

Born May 18th, 1913, at Montreal. Educated at Baron Byng High, Ottawa Ladies' College and Macdonald College. Activities: Basketball, Dramatics. House Committee 1934. Hobby: Weeks-ending. Pet aversion: Hops. Favourite expression: "What's the difference as long as you're healthy."

**FALK,
KATHARINE
HOWARD (KAY)**

"Love and a cough cannot be hid."

Born in a blizzard, March 6th, 1911, in Winnipeg. Educated Montreal High, thence to Macdonald College High. Matriculated 1930. Retired to Vancouver, the call of the East was pressing. Returned to "Mac." 1931-32. Activities: Class president 1931-32; B. H.S. Representative Athletic Assn. 1931-32; Green and Gold 1933; Revue Class secretary 1933-34; vice-president House Committee 1934-35. Favourite expression: "Pooh to you!" Pastime: Being busy.

**GRUER,
MARGARET JEAN**

"Everything is as you take it."

Born February 18th, 1914, at Vankleek Hill, Ont. Educated at Ottawa Glebe Collegiate Institute. Entered Macdonald College as a Sophomore in 1932. Hobby: Visiting the Capital. Favourite expression: "Maybe."

**HALL,
ETHEL MARJORIE**

"A penny for your thoughts."

Born to celebrate the King's birthday in 1913, at Lennoxville, Que. Educated at Lennoxville High School, Bishop's University and Macdonald College. Activities: Class president in junior and senior years. Dramatics, acting in major and Inter-class plays. Bronze Medalist 1934. Favourite expression: "I wonder."

HOUSEHOLD SCIENCE

**HOLLIDAY,
ETHEL PATRICIA
(PAT)**

Stork being delayed on Christmas Day, arrived on December 26th, 1912, in Montreal. Attended Argyle, Commissioner's High, Quebec, Roslyn Avenue, Westmount High Schools, McGill University and finally "Mac." Activities: R.V.C. Rifle Club 1931-32; Basketball manager 1933; Class Basketball 1933-34-35; Class Play manager 1933; Class secretary 1935; Class representative on House Committee 1935; B.H.S. representative to "Old McGill" 1935; vice-president Home Economics Club 1935. Hobby: Sleeping.

**KEAY,
JANET ELDER (JAN)**

"A little nonsense now and then
Is relished by the wisest men."

Born September 2nd, 1913, at St. Andrews-by-the-Sea, N.B., where early education was received. Entered Queen's University 1931, then to "Mac." for B.H.S. Degree. Activities: Treasurer of House Committee 1934-35. Favourite expression: "Pipe down." Hobby: Sleeping. Pet aversion: Crumbs between the sheets. Ambition: To travel.

**MacKAY
ISABEL LOIS**

"Yet holds the eel of Science by the tail."

Born January 9th, 1911, at Stellarton, N.S. Educated at Stellarton and New Glasgow High, and Provincial Normal College, Truro, N.S. Came to Mac. 1931. Interests: Music, "Hops," swimming, tennis, with a bit of riding "thrown" in. Hobby: Collecting recipes. Pet aversion: Writing exams.

**MacKENZIE,
RUTH**

"Come, my best friends, my books, and lead me on."

Born February 7th, 1913, at Brockville, and educated in the schools there. Activities: House Committee 1931-32, 1933-34; Class Badminton manager 1931-32; Associate Editor Failt-Ye Times 1932-33; 1933-34; Annual Board 1933-34; Class president 1932-33; president Reading-room Committee 1933-34; secretary Home Economics Club 1934-35; vice-president Literary and Debating Society 1934-35. Hobby: Graveyard prowling.

McNUTT,

RUTH GERTRUDE

"I now believed, the happy days approached, nor are my hopes deceived."—Dryden
Born in Westmount, 1913. Early education at Macdonald High, thence Ottawa Ladies' College. Entered McGill 1930, but gave up Arts for Domestic Sciences. Activities: McGill Hockey Team 1930-31; manager Hockey at Mac. 1932, Class Basketball 1932-33-34; Class secretary 1931-32. Class representative to Home Economics Club 1934-35. Hobby: Excursioning. Pet aversion: 8.30 lectures.

MURPHY,

HELEN EDNA

(MURPH)

"Hail fellow well met."
Birth June 11th, 1913, Halifax, N.S. Education: Convent of the Sacred Heart and Dalhousie University. Activities: House Committee representative 1931-32; B.H.S. representative on Students' Council 1932-33; Science Hockey Team 1932-33; Science Debating Team 1933-34; vice-president of Students' Council 1934-35. Favourite expression "What a racket." Hobby: Week-ends in town. Pet aversion: Sitting still.

NEATE,

DORIS EILEEN

(DORIE)

"A small spark may lurk unseen."

Born April 15th, 1913, at Ottawa. Educated at Ottawa Ladies' College honoured Queen's for a year then to Mac. President Home Economics Club 1934. Hobby: Considering her grandchildren. Favourite expression: "Who, me?"

ROTHNEY,

A. ISABEL (HENRY)

"Is there any more?", said Pooh."

Born July 30th, 1914, at Leeds, Quebec. Educated at Sherbrooke High. Bishop's University and Macdonald. Activities: Senior and Class Basketball 1932-35; Basketball manager 1934; secretary Women's Athletic 1934; treasurer House Committee 1934; Women's representative on Tennis Club 1935; president Women's Athletic 1935. Hobby: Graveyard prowling. Pet aversion: Hats. "Hops" and hims. Favourite expression: "Och, hi."

HOUSEHOLD SCIENCE

SMITH,

MARGARET

MAXWELL (SMITTY)

"Burning the candle at both ends."

Born May 2nd, 1914, at Fredericton, N.B. Educated at Fredericton High and U.N.B. Came to "Mac" for higher studies. Activities: Christmas play, Bridge Club manager. Hobby: Burning the midnight oil. Ambition: To see the world. Favourite expression: "Oh, a funny one!" Pet aversion: Moth-millers.

TAYLOR,

ANCILLA EDITH GRIMWOOD

"Her voice was ever soft gentle and low; an excellent thing in woman."

Born at Fort Saskatchewan, Alberta, 1914. Early education at the Cheltenham Ladies' College, Cheltenham, England. Matriculated 1931 from St. Margaret's School, Victoria, B.C. Entered Macdonald College immediately afterwards. Hobby: Foyer fussing. Pet aversion: Early rising. Favourite expression: "Well, listen—" Activities: Class Basketball 1931-35.

TAYLOR,

A. MARGARET GRIMWOOD

"Our patience will achieve more than our force."

Born 1914, at Fort Saskatchewan, Alberta. Began education at Cheltenham Ladies' College, Cheltenham, England. Matriculated in 1931 from St. Margaret's School, Victoria, B.C. Came to Macdonald the same year. Hobby: Collecting anything. Pet aversion: Putting in time. Favourite expression: "Let's go."

TRUAX,

ELIZABETH WINNIFRED

"A few strong instincts and a few plain rules."

Wordsworth
Born February 25th, 1914, at Grand Forks, B.C. Educated there, at Strathcona Lodge School, Vancouver Island, and at B.C. School of Pharmacy, Vancouver. Activities: Secretary of Class 1932-33; member of Athletic Committee 1933-34; president of House Committee 1934-35; Science Hockey. Pet aversion: Morning bridge. Hobby: Hiking. Favourite expression: "Let's get percolating."

RUGBY TEAM

Captain D. M. Smythe Coach Frank L. Sharpe
Manager C. M. Zinck

A MOST satisfactory rugby season was completed by Macdonald this year. The team almost realized its greatest ambition—that of winning the Inter-faculty Championship. For the first time in history the finals were reached, and, although Medicine attained a substantial victory, they had to fight for it all the way.

Graduation last year saw many valuable players leave and the outlook at the beginning of the season was none too hopeful. However, the incoming students more than adequately filled up the vacancies. Many of the players on this year's team were young and inexperienced; their feat of placing second in the Inter-faculty league is a tribute to the enthusiasm and interest, which they put into the game, as well as to the coaching they received.

The handicap of a short season was not in

evidence this year, ideal weather conditions resulted in a long and very successful season. Outside the regular league fixtures only one exhibition game was played; it resulted in a loss for the College. No outside trips were taken this year, but it is hoped that next year arrangements will be made for at least one fixture away.

Space forbids a detailed account of all the games, but that against Medicine deserves a word of mention. The final score was 17-5; throughout it was hard fought and well played. However, the superior weight of the Meds turned the scales and a fine game was lost.

With practically all of the members of this year's team expected back next Fall, the College can confidently look forward to another successful season. We wish them the best of luck.

ENGLISH RUGBY CLUB

Honorary President Dr. H. D. Brunt

Honorary Vice-Presidents C. Dawes
V. Yolland

THE team on the whole gave rather a discouraging display of Rugger this season. It was broken, however, with periods of really first class football.

The first game was against Wanderers. Unfortunately appalling weather conditions limited the game to forward play, where our light pack was severely handicapped in the line-outs and in set scrums. Mac was losing when the referee, through inability to follow the game in a hailstorm, called 'no-side' ten minutes from time.

The Club played McGill to win a third straight victory. The scrum worked hard, improving on the first game, and the three-quarters almost scored on several occasions with good movements culminating in wing runs. Only McGill's sturdy defence prevented a score. Mussett made the only points with a beautifully timed drop-kick. Score 4-0 for Macdonald.

A long looked-for opportunity was realized when the team went to Kingston to play Queen's University. The game was one of the best of the season. Upon realizing the true metal of the Queen's team (which resulted in

early scores) the dormant spirit of Mac awoke, and the game became fast and furious. Macdonald failed to even up the score of 11-5.

The team fully appreciated the lodgings and entertainment provided by the Queen's men over the weekend.

The Bank of Montreal match was played on the M.A.A.A. grounds; it proved to be Mac's biggest defeat. The Bank fielded a hard-going, well organized team, and deserved their victory.

The game against Vickers took place on the back Campus, resulting in a win for the home team, 6-3.

The best game of the season was against M.A.A.A. After a keen and exciting first half, the score was 6-3 for Mac. After continual attacking, Mac fell back to defence during the last few minutes of the game, and allowed M.A.A.A. to score a goal. Score, 8-6 for M.A.A.A.

Unfortunately the Club will lose several prominent members through graduation, including Guy Shewell, the captain. Shewell was a driving force in the team. He represented the club on the Quebec side in the inter-provincial match against Ontario.

SOCCER

Captain Robert Flood

Manager Frank Cooper

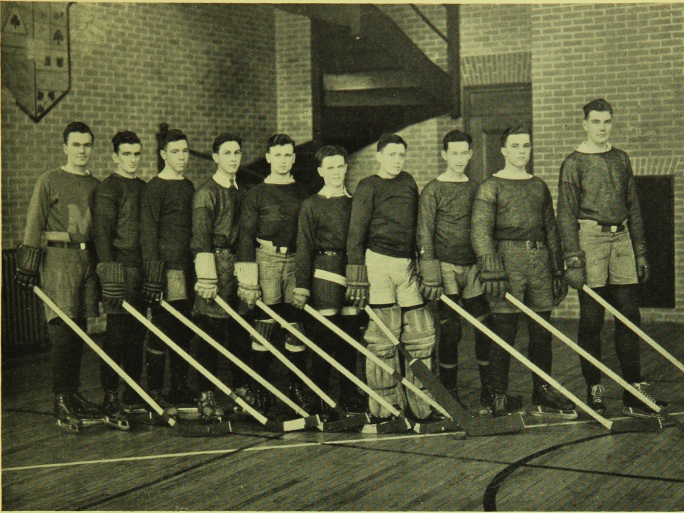

THE record of the Soccer Club at Macdonald this year was not one of particular brilliance but not because of a large number of defeats. We did not lose a match out of the three played. Amongst these was the inter-faculty which was played against Arts-Engineers, and resulted in a 3-2 score in the favour of Macdonald, which made us the holders of the title for our fourth year in succession.

The reason for the small number of games played by the Macdonald team as such, was due to the contribution of players to the University team. The following five men were regular members of the McGill team, Cooper, Inniss, Horsnall, Cahusac, and Flood, who representing our best players, left the home team at a severe disadvantage. This is not felt to be a matter for regret, as in the minds of

all, the University team has indisputably the first claim. We hope to continue supplying some material for Hay Finlay, though in order to do so effectively our home squad must be maintained.

The Boving Cup feature of the Club is still one which arouses great interest, and it is to be hoped that, even if the play has to be carried on partly by rugby men that it will be continued.

A long season such as the last had everything in our favour; the ground was in perfect condition, but where numbers of active supporters was concerned the pendulum was certainly at the bottom of its swing. Being a pendulate action, it must experience a revival in the near future.

HOCKEY TEAM

Manager S. Kneeland

Coach A. Dubreuil

THE activities of the Macdonald College Hockey Team for the season 1934-35 have been very outstanding as compared with others years. This is the opinion unanimously accepted in Athletic circles, and can be contributed to the enthusiasm which the boys have shown, and the excellent coaching ability of Armand Dubreuil. It is true that the never-dying ambition of winning the interfaculty honours was again unrealized, but the competition in the games involved was very keen, and featured a superior brand of hockey to that displayed in other years. This is the first year that the College team has been able to enter into games with outstanding clubs such as Ste. Annes Wanderers, Lachine and Pointe

Claire. In these exhibitions, the boys played such a high standard of hockey, that even these teams found them worthy opponents.

There was an appreciable increase in the numbers attending the games this season, showing interest comparable to that shown towards other sports. In fact the enthusiasm of the students in general in connection with Hockey, has been a very encouraging factor in the promotion of Canada's national sport at Macdonald.

The College is deeply indebted to Armand Dubreuil, whose untiring efforts in coaching the players, enabled them to develop a real team spirit.

BASKETBALL

Coach F. Sharpe

Manager G. Haslam

THIS year we had but one basketball team representing the College. Though not as successful as in other years, we were brought in contact with other colleges through the newly formed Intermediate Intercollegiate League. It has been Frank Sharpe's main idea to establish the college in a league with other college teams. Last year an exhibition league was started, and this year a step further was taken and a playing schedule drawn up. At present, those represented in the League are, McGill, University of Montreal, Loyola and Macdonald. In the near future, however, we hope to see the entrance of Ottawa University and Bishops.

With the schedule of the Intercollegiate League on hand, it was decided that it would be too full a season to play in the Montreal Basketball League as well.

We have played a fair number of exhibition games as well as those scheduled in the

League, so the season has not been too dull. Graduation claimed many of our numbers last Spring, and as there were not many new recruits, the season was started with one team. Several players have turned out to practice since then, and a good team is evident for next year.

New men on the team this year are Benny Lamb, Jimmy Houston, both from Macdonald High School, and Donny Adamson. We were very unfortunate to lose the services of Frank Cooper. Next year we will lose a few more players by graduation, but new men will be coming in and great possibilities are expected from those who did not make the team this year.

Next season we expect to see two teams at Macdonald, and a more complete intercollegiate league. There is also a possibility of re-entering the Montreal Basketball League. Thanks are due to Coach Sharpe for his efforts and enthusiasm, to which many of the successes of the season must be credited.

WOMEN'S BASKETBALL

BASKETBALL is a game for the girls too! Although we don't come off with all the honours, we do enjoy it in our own way.

According to custom, a house league was formed to compete for the John L. Todd Basketball Trophy. This was won by the Freshettes this year — congratulations Freshettes. Six teams entered the League, one from each section in the School for Teachers, and the remaining four from Science. Owing to a lack of players, the Juniors and Seniors combined to form one team. After winning its way into the semi-finals it was, in the end, defeated by the Freshettes.

The Teacher-Science game started off the season, and was won by the Teachers, their excellent combination being the deciding

feature. A number of promising players turned out for the College team, but according to the book of rules, only nine were chosen. Early in February, the Mac team easily defeated the Old Girls. Owing to a misunderstanding about rules, etc., the first game with Bishops College turned out to be a one-sided affair for Mac. The second game was not played. On the whole, a great deal of interest was shown by the girls in basketball this season and although we would have welcomed one more outside game, we regret that it is all over for another year.

We are all especially grateful to Miss Heathcote for her splendid efforts in coaching the team. It was only through the unselfish work on her part, that the season proved a success.

BOXING, WRESTLING, FENCING AND TRACK

Treasurer.....H. Webb Manager and Boxing Coach.....F. Cooper
 Wrestling Coach.....E. M. Snilner

"Fight the Good Fight with all thy might."

THE activities of this club have been somewhat marred this year by the absence of experienced coaches. This situation has affected the boxers more than the wrestlers, since E. Snilner's undying efforts to coach the wrestlers have proved meritable.

As it has been mentioned in the article on the Athletic Association, under whose jurisdiction this club comes, it will not be necessary here to discuss the reasons for holding only one Smoker this year instead of two as has previously been the custom.

The boxers were all new to the game at the

beginning of the season and thus it was felt, when the time came along for the interfaculty assault, that it would be advisable to concentrate our efforts on the College Smoker. During the season we suffered the usual depletion in numbers due to the inevitable wane in interest. It might here be necessary to offer some explanation. At the beginning of the season twenty men enlisted as members of the boxing squad. At the end of the season this membership was slowly but surely depleted to five. It, however, was well worth the maintenance of the club to note the progress of these stalwarts. They surely represent the true blood of the sport. The spirit behind their efforts, was a noticeable feature of the 'Smoker'.

Our sole representative in the interfaculty Assault-at-Arms was I. P. Lazarovitch, who put up an exceeding good fight in his bout against Wisdom. It was unfortunate, that with the fight well in hand, that one slip of the guard should loose him the bout and gain for his opponent a knock-out victory. Lazarovitch did have the opportunity to climb to the title of intercollegiate representative, but was unable, because of more important engagements, to continue.

Marked progress was in evidence in the activities of the wrestlers this year. The coach can certainly boast of a successful season although none of the following: D. G. Cannon, D. E. Gibb, R. H. Gilker, H. L. Fletcher, A. V. Belanger, E. M. Snilner and A. Ayre, who represented Agriculture at the interfaculty meet, gained an active victory. Ayre won his title by default and of the others Snilner and Gilker both made an outstanding bid for the honours.

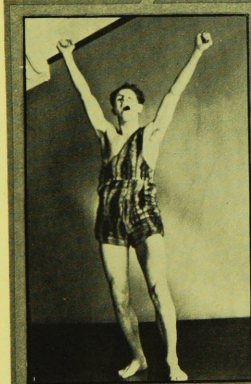

The Smoker was, from the general consensus of opinion, a great success. All that were fortunate enough to be present witnessed an evenings entertainment of unusually high order. The standard of fighting was perhaps not so high as might be desired from the coaches point of view, but there was a great sporting spirit behind the efforts of all who took part, and with the much appreciated help of the Staff we were able to run things off without a hitch.

Our only member of the Inter-Collegiate track team was G. Ayres. He justified his selection by placing second in the running broad jump.

As usual, fencing has not played a prominent part in the Club's activities this year but we are indebted to C. E. Chaplin and James for their exhibiting their art at the Annual smoker.

THE COLLEGE ORCHESTRA

Conductor.....A. B. McB. Walsh

THE college orchestra has now been in existence for three years, and each year has seen a continued increase in its activities and popularity. During the past year the orthophonic was used for only two Saturday night hops; the orchestra was heard at all the others.

Playing for dances accounted for only a part of the time devoted to the orchestra by its members. Every Saturday night dance was preceded by a practice some time during the week, usually on Friday evenings. This year's Green and Gold Revue contained several original numbers for which orchestrations were not available. This music had to be transcribed, arranged and transposed for the various instruments, and this work was done by the orchestra members themselves. Add to this the time spent in learning this music and practising with the choruses, and one begins to get an idea of how much time and effort has been expended in trying to make the

orchestra a popular and permanent institution.

It is not possible to single out one or two members for special mention; an orchestra is judged on its performance as a unit. This year's orchestra performing so smoothly is due to each member's mastery of his particular instrument and to the fact that no one instrument tried to predominate.

The frequent services of Miss Porter and of Mr. Kneeland as guest pianists enabled the members of the orchestra to dance occasionally. Financial assistance from the Students' Council made it possible to keep up to date with current dance music and to keep the instruments in playing condition.

This year's orchestra consisted of the following: *Conductor*, A. B. Walsh; *Piano*, Jean Robb; *Violin*, Flora Gordon, Dave Dingwall, Doug. Cannon; *Saxophone*, Guy Hamel, Gerry Haslam, Wally Humphreys; *Trumpet*, David Monks; *Bass*, Bob Gibson; *Traps*, Bruce Inniss, Don Smythe.

THE CANADIAN SPOOL COTTON COMPANY
MONTREAL

Makers of Coats' and Clark's Spool Cotton

Modern Methods of Manufacturing Cotton Threads

Selection of Raw Material: To secure the desired strength in the finished thread, care must be taken with the raw cotton used to be sure that the fibres are of the finest quality available. Experts are employed to judge cotton for fibre, strength, flexibility and finish of staple, to insure the proper strength and fineness in the finished threads. Most of the cotton used is "Egyptian". This is a longstaple, brownish-yellow cotton. The brown color is caused by the muddy waters of the Nile.

The cotton is picked, ginned (seeds extracted) and baled before it is shipped to the mills. It reaches them in bale form.

Bale Breaking: When received at the mills, each bale of cotton is opened by the mechanical bale-breaker. The compressed fibres are loosened so that they are all exposed to the atmosphere. They must contain a certain percentage of moisture to secure the best results. This moisture content is mechanically and scientifically controlled throughout the whole manufacturing process by means of proper ventilation and by humidifying machines.

Opening and Scutching: To open the fibres still more and to remove the foreign matter such as sand, parts of leaves, seeds and stems, the cotton is passed through mechanical pickers or "scutching" machines, which really beat the cotton and finally deliver it in the form of thin wide laps resembling cotton batting. This cleaning operation is repeated a second time to be sure that all impurities are out.

Carding: The large laps of cotton, about 39 inches wide, are sent to the carding machines, where literally thousands of small wire hooks revolve on a cylinder and pull out the smaller imperfections remaining after the previous processes. Carding is the first of many processes which straighten the long fibres and eliminate the shorter ones. Each lap is drawn out into a thin layer, which is formed into a light rope of cotton technically known as a "sliver". The slivers pass from the machines and are wound spirally into a deep metal pail.

Eighteen slivers are combined and drawn out by machine to form a small lap about 10 inches wide. Six of these combed laps are refined further and reduced to one ribbon lap resembling absorbent cotton and equivalent in size to one combed lap.

Combing: To remove all but the long staple cotton the ribbon laps is combed. The combing

machine has more and finer hooks than the carding machine, so that it takes out not only minor imperfections as still remain in the cotton, but also more of the shorter fibres. The combing machine eliminates as much as 24 per cent of the cotton in the original sliver. In other words, at this particular point almost a quarter of the cotton is removed and becomes waste.

Drawing: The combined slivers are passed through drawing frames. These machines are sets of rollers running at progressively increasing speeds and, as the name indicates, they serve to draw out the cotton into finer form with the fibres lying parallel. Six slivers enter the machine to come out as one.

Slubbers, Intermediates and Jack Frames: These three machines are very similar to the drawing frames. Their function is to reduce gradually the size of the sliver until it is fine enough to spin into yarn. The product of each machine is called "roving", and six or eight ends are taken after each operation and are combined to feed into the successive machine from which they come out as a single strand. The repetition of this operation insures absolute evenness and uniformity in the cotton yarn.

Spinning: The last step in the drawing out or refining process is controlled by the rollers on the spinning frames. The resultant fine strand is delivered to the spinning spindles which add the desired twist. They revolve at a very high rate of speed and produce a single yarn of the proper size and strength for the development of thread. Adjustments are made in the spinning frames to produce yarns of different size and twist, thus making it possible to make threads of different sizes to suit the various needs.

Twisting: The spun yarn is doubled and twisted. In other words, two of the fine strands of yarn are twisted together to form two-ply yarn. Then three strands of two-ply yarn are twisted together in the opposite direction. The result is Six Cord thread with its cable construction.

Summary: It takes approximately six weeks for a bale of cotton to be made into spools of thread. This fact is largely due to the many steps in refining and manufacturing and the care exercised in each step with the aim of producing perfect products of high quality.

A MESSAGE to STUDENTS

The business or professional man knows the true value of a sound banking connection . . . it is an essential part of his daily life.

You, also — when college days are over — will learn the importance to you of your banker.

It is never too early for the student to form this contact.

During college days a banking connection may be established which will prove useful now in helping you to build up a "success" fund and as a place

to deposit money from home, and of advantage later when you enter business or professional life.

The Bank of Montreal — Canada's oldest bank — welcomes your account while you are still at college, and — with its long experience, great resources and nation-wide organization — it is in a position to give you helpful service wherever you may live in later years.

Your business will be welcome at the Bank's Ste. Anne de Bellevue Branch.

normally of fifty odd singers, has sung for us at previous Founder's Day concerts, and though not quite at full strength on this occasion, gave us a superb concert. Also very much on the programme was that delightful person "Pat" late of the Aylmer Radio Programme, singing Milne songs, and Mrs. Walter Clapperton as soprano soloist.

The organization and administration of the Lit of necessity calls for the cooperation and services of a great many people, both staff and students, at different times. In conclusion of this record, it is the wish of the officers to express their sincere gratitude to all those people who have given unsparingly of time, talent and labour in any one of these activities.

Particularly would we like to acknowledge our indebtedness to the following. To the Executive Committee for their consistently wholehearted endeavours to meet and comply with our many requests and petitions, on all occasions. To the committee of judges for the Play Contest. To the Department of English for their cooperation in the production of "Alice in Wonderland". To the Ste. Anne's Women's Club, for their invaluable loan of

furniture and fittings for the stage on all occasions. To those members of the staff who, as already mentioned, enabled us by generous financial assistance to enter the Dominion Drama Festival. To Prof. Bunting for his great kindness in procuring for us a motion picture entertainment during the second term. To Miss Burroughs and her staff who on many occasions and at personal inconvenience have provided refreshments for visiting concert parties and lecturers. To all those students who have given odd moments of their time to the countless necessary jobs which occur during the year. To the Sceneshifters' Guild whose works are manifest. To Mr. Aird Nesbitt, for his readiness at any time to prove his interest in our activities. Finally to Dr. Brunt, who, because he is our Honorary President, is not content to let it go at that, but stands by always with invaluable assistance, advice or criticism—a friend and ready helper.

Last of all we wish to apologize sincerely to all those who feel that their services should have been acknowledged herein, and to assure them that though, for lack of space, unrecorded, they are not forgotten.

DANCE COMMITTEE

Carson Cross

Gerald Haslam

Irene Coulson

Mona Emsley

IT has been the goal of this committee to equal, and if possible to surpass, the achievements of those that have preceded it. Throughout the year we have striven to reach this goal.

With the aid of the college orchestra under the able leadership of Brad Walsh, good music has been supplied for almost all the Saturday night dances. The committee is deeply indebted to this energetic group of musicians.

Three extension dances were held during the year. In each case an orchestra was imported from Montreal to supply the music. The first of these, the Hallowe'en Masquerade, was a pleasing blend of soft lights and gay costumes. The Christmas Dance was a most attractive affair with Christmas trees, concealed lights and a false ceiling. The third and last of these dances was outstanding in several respects. In the first place the committee obtained permission to extend the time from 11 to 11.30 P.M. The extra time was badly needed because, due to the early starting time, the orchestras were often late, and this left the time for dancing very short. Secondly, the dance itself was somewhat original in that it was called the Country Club Dance, and only summer clothes were worn. The success of these extension dances, especially the fancy dress affairs, depends to a great extent upon the cooperation of the student body. The committee appreciates the excellent cooperation shown by the students during the past year.

The policy of decorating the hall as much

as possible was adopted by the committee, and it was found that at a slight extra cost the whole aspect could be changed and the success of the affair greatly enhanced.

The three Formal Dances were under the efficient guidance of Pope, Hilton and Cooper. The first was put on by Norman Pope on November 23rd. The scene was in India. The orchestra was seated in a great domed temple and the walls were adorned with silhouettes of serpents, idols, and other objects native to that eastern country.

The second Formal on February 1st, was run by Robert Hilton. The decorations depicted a country scene in Holland; the orchestra being in the garden of a quaint cottage overshadowed by a huge windmill. The ever revolving vanes of the mill helped to add to the reality of the scene. The music at this dance was exceptionally good.

The third formal was supervised by Frank Cooper and was held on March 29th. The scene was laid in an English garden in springtime. As the music flowed from a rustic garden house with the setting sun in the background, the dancers waltzed in a glade surrounded by flowers and shrubs.

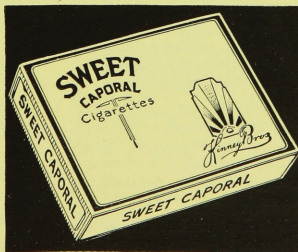

We are greatly indebted to the many persons who assisted in the work attached to these dances, for without the aid of many helping hands such dances would be impossible.

Financially the year has been a successful one for the committee. It has been able to give a great deal of entertainment with a very small appropriation.

SWEET CAPORAL CIGARETTES

Public approval is the only worthwhile criterion by which the merits of a cigarette can be measured! And when the Public greets a cigarette with the enthusiastic welcome which has been shown for Sweet Caporal, you can be quite sure this cigarette has something not found in other cigarettes.

SAVE THE POKER HANDS

MEN'S RESIDENCE COMMITTEE

President H. G. Longley, Agr. '35
Vice-President H. J. Miles, Agr. '36

Treasurer C. M. Zinck, Agr. '35
Secretary D. A. Adamson, Agr. '37

THE past year has been one of very gratifying changes from the point of view of the Men's Residence Committee. The appointment of Dr. W. H. Brittain as Dean of the Faculty of Agriculture, was the first event to augur favourably for a successful and effective functioning of the committee. Another change, of rather medial importance in itself, but one of very desirable results, was an amendment to the constitution, whereby the Presidents of the respective classes become automatically members of the committee. This change has added greatly to the prestige of this group, and has aided considerably in its smooth functioning throughout the year.

An addition to the cares of the committee, was the introduction—to fill a long felt want—of a “Coffee Shop”. This has been supervised by the House Committee, and has proved to have been very popular with the men students. The originator of this idea was Robert “Bob” Flood, President of the Students' Council. With the aid of the Student Relationship Committee—Messrs. L. C. Ray-

mond, A. J. G. Maw, and L. H. Hamilton—and our Bursar, Mr. Ward, a very suitable and attractive room has been fixed up in the basement of the men's residence.

The establishment and operating of this shop has not only been an improvement to the residence, but has gone far in getting the cooperation of the students in setting an outstanding record of good behaviour. It is hoped that in the future, more such renovations may be made to our basement, until we have complete accommodation for the students during recreational hours.

Mr. A. J. G. Maw was again Faculty representative in the residence. Thanks are due to him for his many helpful suggestions in connection with Committee activities.

It is felt that if the students continue in electing to the House Committee, only those in whom they have full confidence to maintain student government at its present level, it will be an easy matter to continue the cooperation which now exists between the Committee and the students.

LE CERCLE FRANCAIS

CETTE année le cercle Français a considérablement changé la routine des années précédentes. Dans le passé il n'y avait qu'un comité exécutif central pour toute la classe Intermédiaire, nous avons inauguré pendant cette session un nouveau système. Chaque section de la classe a eu son propre comité ainsi que des réunions particulières.

Les trois sections se réunirent en commun trois ou quatre fois, pour entendre une conférence donnée par un personnage de haute renommée, venant de Montréal. Ces réunions furent très éducatives pour nous, des instituteurs et institutrices en herbe.

Les réunions générales prirent place en classe pendant les heures de cours, ce qui fut très apprécié par les étudiants. Pour ces réunions, l'on nommait auparavant un chef-de-cérémonie qui se chargeait de préparer un programme, auquel se trouvaient des chan-

sons françaises, des histoires, des casse-têtes, des dialogues ainsi que des petites comédies, tout cela aidant beaucoup à rendre nos réunions d'une grande valeur. De temps à autre la réunion fut consacrée à la mémoire de quelque grand homme, tel que Molière, Racine, etc. Une courte discussions des affaires en main précédait chaque fois au programme.

Nous avons eu l'honneur et le privilège d'avoir comme conférencier Mlle. Léa Tanner, que l'on connaît tous, M. le Chanoine Chartier ainsi que M. le prof. J. Bruchési, tous deux de l'Université de Montréal. Ces assemblées furent très appréciées, par tous et d'un bénéfice sans bornes.

En somme, avec la précieuse assistance de Mlle. Brownrigg, le Cercle Français n'a pas seulement aidé ses membres, mais il a aussi ajouté beaucoup à la vie familiale de notre collège.

It's never too early to learn to value **L A B E L S**

It will give you a good start into the world to learn early in life the worth while brands of merchandise.

THE DEBATING UNION

A CONSIDERABLE augmentation of the interest usually shown in the Debating Union has been noticed this year. This has been due to the effect of the new rules for the Robertson Shield debates, brought forward by Mr. Flood. These rules call for eight speakers on each side, thus enabling sixteen men and women to get a little practice in platform speaking. Further, the various debates are conducted according to Parliamentary procedure. The first debate under the new rules showed very clearly that there was a very considerable lack of knowledge of Parliamentary procedure and the Committee feel confident that the new rules have been of great service in catering to an evident need.

The first meeting of the Union was held on Nov. 19, 1934. At this time the following officers were elected:

President.....	Mr. Flood
Secretary.....	Mr. Dingwall
Committee member for Agriculture.....	Mr. Lazarovitch
Committee member for Teachers.....	Miss Kahn
Committee member for Household Science.....	Miss Truax

The first debate conducted under the new rules was that of Sophomores vs. Freshmen. The Government, represented by the Sophs introduced a Bill to give the Government power, in time of war to conscript any able-bodied citizen into military service. After an extremely lively and interesting debate the Opposition won the day and the Government went down to defeat.

In the debate, Seniors vs. Juniors, the Opposition (Seniors) again won the verdict when they opposed Governmental measures

to relieve unemployment by putting into effect a back to the land movement.

An extremely interesting debate was heard on the motion, "In the opinion of this House the English speaking women of the world, have been more fitted to undertake their marital responsibilities due to the indulgent attitude of their men." The affirmative was upheld by Miss Robb and Miss Cosman. The negative was argued by Mr. Hudson and Mr. Carlyle. After the speakers, the motion was thrown open to the House and some extremely humorous comments were heard from the audience. The affirmative carried the verdict.

The Debating Union achieved a very considerable triumph for Macdonald when four speakers under its auspices defeated four speakers from O.A.C. in two debates, one at Macdonald and one at A.O.C., on a motion "that there are too many graduates." The Macdonald men, Flood and Hanomansingh debated the affirmative at A.O.C. and won a signal victory. Dingwall and Lazarovitch carried the day at home, debating the negative.

Going to press there is one more debate to come—the final round of the Robertson Shield, Seniors vs. Freshmen. — LATEST: won by Seniors.

After a very closely contested fight the Teachers gained a well deserved, but close victory over their rivals, Science.

In the Diploma debate Dip. I. were the victors.

The Committee are to be congratulated on having produced a very fine programme for the year.

THE SOCIAL RESEARCH CLUB

President.....	I. Lazarovitch
Corr. Secretary.....	A. Wolfe

WAR and the suppression of civil liberties are the burning issues of to-day.

A twofold purpose motivates the activities of the Macdonald College Social Research Club; first, to consider impartially the main trends of the present economic system, and the basic changes that should be affected; second, to arouse and organize campus sentiment against the twin

Vice-President.....	C. Chaplin
Secretary.....	E. Burnell-Jones

menace of War and Fascism.

Membership is open to all students who are earnestly opposed to these evils, and are bent upon destroying them. The Social Research Club is not the advocate of any one political doctrine, but seeks to unite all elements in a fight for freedom and peace. It believes wholeheartedly that only a united front composed of conservatives, liberals, intellectuals and socialists, can ward off the danger menacing on both sides.

THE DIPLOMA ALUMNI ASSOCIATION

Hon. President Dean Brittain President Prof. L. H. Hamilton
Secretary-Treasurer H. A. Templeton, Dip. '33

THE biggest event of the year for the Diploma Alumni is the Annual Dinner. To make it a more collegiate affair, and to provide for the larger number of students in the course, it was held in the college Dining Hall on March 9th, at 7.30 p.m. Owing to the fact that very few of the former students could attend the dinner, because of inclement weather and lack of accomodation in the residence, the students at the College took a larger part in the organization.

The President of the second year, Mr. Macdonald, acted as chairman, and Dean Brittain, who had been elected Honorary President, was the chief guest. About a dozen of the former members were in attendance, to add their experiences to the abundance of conversation. As the Green and Gold had been held a week earlier, the usual Saturday night

dance had been cancelled, so everybody returned to the residence to converse on all topics.

The idea of corresponding with the students after they have left Macdonald has been continued, and by this means the present whereabouts of the students is known, and their successes kept track of.

Owing to financial conditions, the *Fault-Ye Times*, which has succeeded the *News-Letter*, was distributed only to those who paid the special rate. The usual Diploma number of the same publication was not issued for the same reason.

In order to bring the Diploma students of the past few years together during the summer, a reunion may be arranged, at which those who have only seen the College under a coat of snow may see it in its beautiful floral background.

CANADIAN SEED GROWERS' ASSOCIATION HOLDS MEETING AT MACDONALD COLLEGE

THE annual meeting of the Canadian Seed Growers' Association was held at Macdonald College from June 25th to 27th, 1934. This association developed out of the Macdonald Robertson Seed Growers' Association in 1904. Sir William Macdonald and Dr. J. W. Robertson were thus associated as founders of this association as well as of Macdonald College. It was therefore appropriate that on its thirtieth birthday it should meet at Macdonald College. The aim of the Association is to improve the yield and quality of farm crops through the multiplication and distribution of seed of the best varieties. Through it, means are provided by which varieties of superior merit may be made eligible for

registration; and standards are set by which users of seed may get seed that is genuine as to variety, and of the highest quality.

Macdonald College has always been closely associated with the work of the association in its efforts to improve Canadian agriculture. Dr. J. W. Robertson held the office of President until 1921, Dr. L. S. Klinck, the first Professor of Agronomy, was a Director until he left Macdonald College in 1914. The staffs of the Agronomy and Horticultural departments have taken active parts on the technical committees of the association.

At the meeting held in June Professor R. Summerby was re-elected as President for the year 1934-'35.

PLAYERS' CLUB

President J. A. Dunn

THE Club may well look back upon the past year with satisfaction. The usual two Three Act plays were performed, and in addition the Club entered for the Regional Contest of the Dominion Drama Festival.

The "Wind and the Rain" by Morton Hodge was produced on Dec. 19th, and, dealing as it did with the life of students in a Scottish University, could not help but appeal to a College audience. Guy Shewell, as Charles Tritton, was outstanding in a difficult part and was of great help to the producer in that he had seen the original company in London during the previous summer. Anne Hargreaves, played by Margaret Smith, was quite one of the finest portrayals of a part given by any girl upon the College stage during the last few years. Norman Pope and Drummond Mussett as John Williams and Gilbert Raymond deserve commendation, especially the latter whose happy-go-lucky manner endeared him to the audience.

Gordon Hebert produced Robert E. Sherwood's comedy. "The Queen's Husband" on March 27th. He is to be congratulated upon the results which were obtained in so short a time available.

Bill Morris as Eric VIII, the henpecked King, was the centre of the play and its success or failure depended upon him, and the manner in which he carried the play through deserves high praise. But then some say that

the part might have been written especially for him. Jean Porter was the Queen and Jean MacGregor as Princess Anne were most convincing, and the part of General Northrup played by Robert Flood deserves mention.

N. K. Smith's Fantasy "They Refuse to be Resurrected" was chosen as the entry for the Drama Festival, and it is perhaps enough to say that, although competing with seven other of Montreal's Amateur clubs, the College was placed only two points behind the winners. The play was well received by the Audience, and the adjudicator in his criticism praised both the choice of play and the efforts of the actors and Norman Pope in particular. This entry for the Contest was a new departure for the Club but it is to be hoped that it may be continued, as the experience gained by the players was both useful and pleasant.

Finally the Scene Shifters' Guild, the work of improving the scenery, which was begun last year with the building of the Proscenium, was continued. At the beginning of the year a complete new set of scenery was built. It was designed with an eye to the future, flats were made to be interchangeable, with the idea that as year's go by additions may be made as necessity calls, so that future producers will not find themselves faced with the difficulty of finding new sets for each play. Those improvements together with the new switchboard which was installed by the College, has done a great deal to improve the efficiency of the production of plays.

The Official (Registered) Crest Pin of Macdonald College

Two years ago,—believing that our College should have a Crest Pin of its own which only bona fide and accredited students of Macdonald College might obtain and wear, and which could be worn by students of all affiliated groups,—designs were asked for by the Students' Council, and one selected.

This design is made in either Pin or Ring form, and bears the name of our College in full, together with the College Crest and motto.

This design is Registered and fully protected to the use of the Students' Council or to their order. Now,—we all wear the same Crest, and the tiny guards on the Crest Pin designate the individual Faculties.

May we ask that you wear it and help safeguard it.

CANADIAN SOCIETY OF TECHNICAL AGRICULTURISTS

THE objective of the C.S.T.A. is to organize and unite all workers in scientific and technical agriculture, so that they may combine their efforts to promote the scientific and practical efficiency of the profession, and to make the profession of increasing service to the agricultural industry. To reach this objective, the Society attempts to maintain high professional standards, encourages a national policy of agricultural research, aids in securing and maintaining a closer cooperation among all workers engaged in the profession in Canada, as well as between the various Provincial Departments of Agriculture, and aids in ensuring the employment of technical men for technical positions.

The Society maintains two publications to assist in the dissemination of scientific knowledge and to aid in the solution of agricultural problems. Scientific Agriculture is the publication which contains purely scientific articles, while the C.S.T.A. Review is of a more general nature and contains extension articles and news of the Society. Members of the Society receive both publications.

The Macdonald College Branch of the C.S.T.A. was established in 1920. Regular membership is limited to those persons who are graduates of a university or college, and

who are engaged in some form of work relating to agriculture. Student members are accepted from the senior students of institutions in agriculture and after one year become regular members.

The local branch of the C.S.T.A. each year brings in speakers from various parts of the Dominion to discuss the latest developments in agriculture. The senior and graduate students are usually invited to attend these meetings. This year the first meeting was held on November 6, 1934. Dr. E. S. Archibald, Director of the Experimental Farms, discussed the agricultural situation in England, while Dr. J. E. Lattimer told of the agricultural conditions in Germany. On December 11th, Dr. C. L. Huskins, of the Department of Genetics, McGill University, discussed "Some Current Genetic Viewpoints" especially with regard to agriculture. Dr. L. E. Kirk, Dominion Agrostologist, visited Macdonald College on January 23, 1935. He discussed the problems with reference to the future of alfalfa in agricultural work. An interesting discussion of the livestock problem, especially in Sweden and Denmark, was given by G. B. Rothwell, Dominion Live Stock Commissioner, on February 27th. The Dominion Horticulturist, M. B. Davis, was present on March 20th and discussed some of the recent developments in horticulture.

SOCIAL RESEARCH CLUB (*continued*)

To clarify the many and various phases of the economic and social problem, several prominent speakers were invited to address the numbers. These forum meetings were thrown open to the general student body and staff. An address on the relationship between the worker and the farmer, opened the season. Later, Stanley Ryerson gave a searching analysis of Fascism and a description of the movements in Europe to combat it. Mr. I. Wallace, secretary of the Canadian Labour Defence League, spoke on "Civilization at the Cross-roads," while the Reverend Mr. Lavell Smith stated the case for Pacifism. Of special

interest to the numbers was M. Laxer's report of the Students' Anti-War Conference held in Brussels on December 29th of last year. M. Laxer was the McGill delegate.

Some of the concrete achievements of the Social Research Club were: (1) A questionnaire on war, made possible through the courtesy and co-operation of the editors of the *Fault-Ye Times*. (2) The sale and distribution among the students of anti-war and anti-fascist literature. (3) A library. The members were also encouraged to present papers on topics of broad political significance.

THE GREEN AND GOLD REVUE

THE revue of revues was presented this year under the painstaking direction of H. R. Hudston who introduced, for the first time in the history of this annual event, original music as well as original lyrics. This was a decided step in the right direction, and a step to be repeated in the future.

The scheme of continuity used as an experiment last year was advisedly abandoned in favour of the more satisfactory and more orthodox type of revue consisting of individual skits, chorus numbers and specialty dances.

The skits, with one or two exceptions, were all that could be expected or desired; mainly of topical interest, certainly, but when presented to an audience with such uniform tastes they appealed to one and all, not only in the manner of their production, which was excellent throughout, but in the stage-setting, and in the acting ability displayed.

The trainers of the choruses are to be complimented on the perfection of their finished products. It should not be forgotten that these

products were ground and sweated for many weary hours and stood the strain extraordinarily well. It is beyond doubt that this year we saw the best choruses that have ever been on the Macdonald stage. Of the specialty dances, consisting of a waltz and a tango, it was generally agreed that they were well selected and magnificently performed.

The whole proceedings kept time to the rhythm of the college orchestra, under the directorship of Brad. Walsh. It was due to the melodious efforts of this that the musical numbers went with such élan.

Last but not least comes the appreciation of the Scene Shifter's Guild. It was due considerably to their efforts that the whole programme went off so smoothly, and with such little time wasted between scenes. Too little is known of the few who toil unseen to enhance the beauty or skill of those who monopolise the limelights. Truly it is said "the world knows little of its greatest people."

On the whole "efficiency" was the slogan of the show; efficiency tempered with a light-heartedness that added so much to willing co-operation of all concerned.

Put These Modern Tools to Work in Your Hay Fields

McCormick-Deering Farmall Tractor with 7-foot tractor mower and the McCormick-Deering No. 7 Enclosed-Gear Trailer Mower, cutting a 14-foot swath. In the upper right-hand corner is the Farmall 12, the small size in this famous line of all-purpose tractors, operating a 7-foot tractor mower.

Here is the oil-tight gear case, with cover removed, which is an important feature of the McCormick-Deering No. 7 Enclosed-Gear Mower. The No. 7 features automotive construction, with the entire operating mechanism, including the drive gears, pawls, ratches, clutch, and countershafts, assembled compactly in the gear case. You have never seen anything like this in a mower before.

McCormick-Deering Side-Rake and Tedder

SPEED in the hay field is the order of the day when McCormick-Deering Equipment takes over the haying job. The McCormick-Deering line of hay tools includes the popular No. 7 Enclosed-Gear Mower, tractor mowers for Farmall operations, self-dump rakes, tedders, side-rakes and tedders, loaders, sweep rakes, stackers, and presses. These tools, plus Farmall power, give their owners a big advantage at haying time. Ask the McCormick-Deering dealer about this modern line of hay machines. Be sure to see the No. 7 Mower.

INTERNATIONAL HARVESTER COMPANY OF CANADA LTD.

HAMILTON

CANADA

Turns Leaves In—Stems Out

The McCormick-Deering side rake and tedder forms a quick curing windrow in which the leaves are turned inward to prevent their being torn off the stems, while the stems are turned outward to get the quickest action from the sun and air. The straight teeth of the McCormick-Deering do this as well as any rake can possibly do

it, and give perfect results in tedding as well.

This machine is instantly convertible from a side rake to a tedder by changing the direction in which the reel revolves. One lever controls the direction of the reel, another sets the teeth at the correct slant for raking or tedding.

A FRIEND

THERE ARE OPPORTUNITIES TO-DAY!

The young, intelligent, and active man who considers growing under glass as a business in future has this advantage, to-day. He can start in a modest way . . . with the very best materials . . . at VERY LOW PRICE. And is sure to benefit from the upswing which is now under way.

Our experience gained through many years of co-operation
with growers is at your service . . . *gratis*.

Explosives as a Force in Agriculture

Farmers everywhere have begun to realize the tremendous possibilities of explosives as an efficient, economical and safe method of clearing tracts of land. Stumps, boulders and rocky ledges are obstructions to economical farming. The loss of land occupied by such encumbrances, and the time lost in trying to cultivate round them, greatly increases the cost of production.

For ditching, explosives have several advantages over other devices for doing this work. Stumping powder can be easily transported to the location of the job. The work can be done speedily and it is economical.

In clearing stumps or boulders from waste land and planting your first trees C.I.L. stumping powder does the work easier, more economically and it helps to produce better and larger crops.

Among the many other uses for C.I.L. stumping powder on the farm are subsoil blasting, tree rejuvenation, vertical drainage, burying stone piles, building excavations, blasting wells, ice blasting, splitting logs and many others.

Write for booklet "BLASTOL—THE ALL-PURPOSE FARM DYNAMITE."
